# Badia Race Suit

The Badia race suit was developed according to the latest technical innovations and the experience of professional alpine skiers. The result is a perfect ski suit with maximum ergonomics. The special cut and workmanship performed allow an optimal fit, but at the same time maximum freedom of movement. The race suit has a non-slip elastic at the bottom of the leg for better grip and a practical inside pocket for ski passes. The elastic and lightweight Windtex® fabric is not only water-repellent and windproof, but also allows for the preservation of the natural microclimate and optimal breathability.

# Badia racing suit with protections

Freedom of movement, waterproofness and breathability are very important properties that the Badia RF race ski suit fulfills. The stretchy, lightweight and breathable Windtex® fabric ensures maximum waterproofness and excellent comfort. This thermoregulating membrane with its insulating properties preserves the natural microclimate between the skin and the fabric. When every second counts, the sporty fit and ergonomic cut ensure optimal conditions. Important details not to forget: Non-slip elastic at the bottom of the leg and a useful inside pocket for ski passes.

# Latemar Jacket

The Latemar ski jacket is designed to meet the needs of discerning skiers, offering a combination of functionality, comfort and protection to confidently tackle any weather conditions on the slopes. Functionality is provided by 3 exterior pockets on the front, a ski pass pocket on the sleeve, and a large multipurpose pocket on the back. Inside there is a zippered pocket and 2 additional pockets, one of which is a mesh pocket and the other a multipurpose pocket. The jacket is also complete with a hood, pre-shaped sleeves with windproof Lycra® cuffs, and adjustable Velcro closure. Highest quality also in the choice of fabrics and materials: the outer material is 4 times more tear and puncture resistant than its counterparts in nylon; Valtherm® 120g/m<sup>2</sup> padding ensures perfect breathability and thermal insulation; Windtex® membrane is waterproof and windproof.

# Chamonix Jacket

The Chamonix ski jacket is an excellent choice for professional skiers. Not only because the jacket is suitable for the coldest temperatures, but also because it is well thought out down to the smallest detail. Several pockets (3 outer pockets on the front, a ski pass pocket on the sleeve, an inner zippered pocket, a mesh pocket, and another multipurpose pocket) ensure maximum functionality. The sleeves are pre-shaped with windproof Lycra® cuffs and adjustable Velcro closure. The materials used testify to first-class quality. The Cordura® fabric features perfect breathability and excellent lightness while maintaining anti-pilling function. The snow jacket also features a thick Windtex® membrane that regulates heat and repels water and wind. Valtherm® 120g/m<sup>2</sup> padding ensures optimal breathability, retains body heat and offers excellent insulation properties.

# Pyrenees Jacket

The Pyrenees ski jacket is SAXE's premium model. Elegance and functionality know no limits. The ski jacket offers unlimited freedom of movement and at the same time provides optimal protection against all weather conditions: rain and wind have no chance, comfort remains excellent at all times. The Pyrenees ski jacket has a simple, yet very functional cut. The outer materials ensure maximum resistance to abrasion, tearing, tear and puncture. 6 pockets (4 outer pockets, one ski pass pocket and one large Napoleon pocket), removable hood, underarm ventilation, adjustable drawstring base make the jacket very practical. This jacket has everything you need to ski with maximum safety and perfect protection from water and wind. Valtherm® 120g/m<sup>2</sup> insulation and Windtex® temperature regulating membrane increase comfort while maintaining natural microclimate.

# Pejo Pants

Long days in the snow will be even more enjoyable thanks to the Pejo ski pants. Functionality and comfort, combined with optimal protection from wind and water, make these pants the perfect ski garment. 2 large outside pockets, a short side zipper that makes the pants easy to take off, detachable and adjustable suspenders, adjustable waistband, snow gaiter in the base of the pants and additional edge protection offer everything a skier could want. All made of Cordura®, a lightweight fabric of high quality, yet resistant to punctures and tears. In addition, Valtherm® 80g/m<sup>2</sup> padding, an environmentally friendly alternative to conventional down, provides perfect breathability and excellent thermal insulation..

# Lagorai Pants

Lagorai ski pants are ideal for competition or training. The high-quality Cordura® outer material provides maximum resistance to abrasion, tearing, and puncture and offers optimal protection on the sides due to its cut-resistant function. However, these ski pants are lightweight, allow good freedom of movement and protect against water and wind. Valtherm® 80g/m<sup>2</sup> inner padding provides protection even in extreme weather conditions while maintaining high breathability and perfect thermal insulation. This is complemented by very useful details such as 2 outside pockets, a full-length side zipper for easy removal of ski boots, adjustable and removable suspenders, snow stopper gaiter in the base of the pants, and a Cordura® anti-mine protection.

# Zermatt Pants

Zermatt ski pants are designed down to the smallest detail and made with the utmost care. In addition to the quality of the materials and fabrics, their functionality and versatility is extremely high. Adjustable suspenders, 4 pockets (2 outer zippered and 2 side pockets), anti-mining protection made of sturdy Cordura® fabric and inner snow stopper gaiter. They are an ideal protection against water and wind for being able to spend long days on the slopes, but also for being able to take long walks in your free time. They match easily in style with all SAXE jackets. Your ski school or club will love them.

# Panarotta Jacket

Durable workwear is a necessity for ski lift operators and slope rescue workers, who are faced with a wide variety of situations. Always being outdoors, weather resistance, warmth and full freedom of movement are therefore essential. The Panarotta ski jacket has a simple, yet very functional cut. The jacket has 3 inside and 3 outside pockets, a ski pass pocket on the sleeve and a Napoleon pocket. It also has a detachable hood, reflective piping, inner Lycra® cuffs and an adjustable drawstring hem. Levante fabric provides a water-repellent and waterproof function. The Valtherm® inner padding ensures perfect breathability and thermal insulation, and thanks to the temperature-regulating Windtex® membrane, the microclimate between the skin and the fabric is not altered. Ski lift and piste rescue operators will feel comfortable even in extreme weather conditions.

# Cover Jacket

The SAXE Cover Jacket is the perfect garment if you spend long days in the snow. The jacket is made from a combination of two fabrics: Marmolada and Dolomites. This stretch polyester techno-fabric is very soft, comfortable and has an anti-pilling function. The material provides excellent anti-wear properties and perfect thermal protection. Maintaining a constant body temperature is also ensured by the temperature-regulating, stretchable and lightweight Windtex® membrane. The jacket also features 2 practical multi-purpose outer pockets, a front camlock zipper, and elastic cuffs.
